

Create Branch for refactoring

git switch -c refactor/simplified-schema-modules

new Architecture

Proposed new structure

Plaintext

```
my_app/
├── main.py           # App entry point & MainWindow
├── database.py       # SQLite3 database connection & CRUD functions
├── video_generator.py # MP4 generation logic (MoviePy, OpenCV, etc.)
├── anki_exporter.py  # Anki deck generation logic (Genanki)
├──
└── tabs/             # UI Components only
    ├── __init__.py
    ├── sandbox_tab.py # Interacts with database.py (CRUD)
    ├── review_tab.py  # Core flashcard UI
    └── settings_tab.py # App settings & Trigger buttons for Anki/Video
```

Starting refactoring
